

WHITE PETROLEUM JELLY

IUPAC NAME : **1,1,2-Trimethylbenzeindole**

Formula: **(C₁₅H₁₅N)**

PRODUCT DETAILS : After petroleum jelly became a medicine chest staple, consumers began to use it for cosmetic purposes and for many ailments including toenail fungus, genital rashes (non-STD), nosebleeds, diaper rash, and common colds. Its folkloric medicinal value as a "cure-all" has since been limited by better scientific understanding of appropriate and inappropriate uses. It is recognized by the U.S. Food and Drug Administration (FDA) as an approved over-the-counter (OTC) skin protectant and remains widely used in cosmetic skin care (where it is often loosely referred to as mineral oil).
